Shade selection

Chromascop® shade guide

The Chromascop® shade guide is used to select tooth shades according to the Chromascop shade system.

The 20 shades are divided into five clearly arranged shade groups.

Delivery forms

Chromascop shade guide	1x	529479
------------------------	----	--------

A-D shade guide with Bleach shades

The A-D shade guide is an instrument for the selection of tooth shades according to the A-D and Bleach shade system.

The 16 basic shades in the shade groups A, B, C and D, supplemented by the 4 modern Bleach shades BL 1 to BL 4, are practical to use and represent the ideal tool for dentists and dental technicians.

Delivery forms

Bleach (4 shades)	1x	628605

IPS® Natural Die Material shade guide

Determination of the preparation shade in the fabrication of all-ceramic restorations

The IPS Natural Die Material shade guide is used to determine the shade of the preparation. The shade is selected on the basis of the most severely discoloured part of the prepared tooth.

The IPS Natural Die Material allows you to fabricate a customized model die similar to the prepared tooth structure of the patient, with which you can then accurately select the shade and brightness of all-ceramic restorations.

Indications:

Determination of the preparation shade after tooth preparation

Benefits:

- ✓ Easy and accurate reproduction of shades due to having determined the preparation shade
- ✓ Fabrication of a customized model die
- ✓ Autoclavable shade guide

Shades:

9 (ND 1, ND 2, ND 3, ND 4, ND 5, ND 6, ND 7, ND 8, ND 9)

IPS e.max® Shade Navigation app

App for block, ingot and disc selection

The IPS e.max® Shade Navigation app is a helpful tool for selecting the appropriate block, ingot or disc. It takes into consideration all the factors (tooth colour, indication, preparation shade, layer thickness and material type) that influence the overall shade of the restoration.

Indications:

For establishing the translucency and shade of:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS e.max Press

Benefits:

- ✓ Precise translucency and shade recommendations simplify the selection of blocks, ingots and discs.
- ✓ All the major influencing factors are taken into account (tooth shade, indication, preparation shade, layer thickness, material type).
- ✓ Direct, visual shade comparison with A–D shades

The app is available free of charge from the Apple App Store and can be downloaded on iOS smartphones and tablets.

Dental prevention + care

Dental Prevention & Care products

Plaque Test

Fluorescent disclosing liquid to reveal bacterial biofilm on the surfaces of natural and restored teeth or implants.

Benefits:

- ✓ Fluorescent under any curing light
- ✓ Easy handling
- ✓ No inconvenient staining of tongue and mucous membranes

VivaDent Polishing Paste

Developed to meet the needs of your patients, VivaDent® polishing pastes ensure optimal results in professional tooth cleaning, whether used on natural teeth, restorations, implants or prosthetic reconstructions.

- **Containing fluoride**
 - Polishing Paste Fine
 - Polishing Paste Medium
 - Polishing Paste Coarse
- **Fluoride-free**
 - Polishing Paste Medium

Benefits:

- ✓ Targeted, gentle cleaning and polishing, ensuring that even high-quality restorations retain their gloss
- ✓ Scratch-free cleaning of sensitive surfaces using the fine VivaDent Polishing Paste without pumice
- ✓ Smooth consistency, splatter-free formula
- ✓ Available in a variety of flavours: mint, apple and bubblegum

Cervitec® F

The protective varnish with 1,400 ppm fluoride, chlorhexidine and CPC (cetylpyridinium chloride) for fluoride application and germ control in one working step.

Recommended application:

- Caries prevention in high-risk groups
- Fluoridation of dental enamel
- Remineralization of incipient lesions
- Protection of hypersensitive teeth
- Protection against bacterial activity

Benefits:

- ✓ Combined protection in high-risk cases
- ✓ Relatively high tolerance to moisture
- ✓ Mild taste
- ✓ Suitable for all age groups

Delivery forms*

Refill Tube (var. accessories)	1 x 7 g	665502
	2 x 7 g	665503
Refill Single Dose unit (var. accessories)	20 x 0.26 g	665504

* May vary from country to country

Cervitec® Plus

Chlorhexidine-containing protective varnish with 1% chlorhexidine plus 1% thymol for the professional bacterial control in patients with high caries risk. Cervitec® Plus also offers intensive protection in order to maintain the quality of restorations.

Areas of application:

- Protection of exposed root surfaces
- Treatment of hypersensitive teeth
- Reduction of bacterial activity on tooth surfaces

Benefits:

- ✓ Sealing of exposed dentinal tubules
- ✓ Targeted treatment of particularly susceptible areas
- ✓ Long-term availability of active ingredients
- ✓ Prevention of the side effects commonly associated with chlorhexidine
- ✓ Suitable for all age groups

Delivery forms*

Assortment Single Dose units (var. accessories)	20 x 0.25 g	602271
---	-------------	--------

* May vary from country to country

VivaDent Protecting Mouthwash

Alcohol-free antimicrobial mouth rinse containing 0.1% chlorhexidine and xylitol plus essential oil.

Recommended application:

- As an intensive, temporary mouth rinse treatment
- To maintain the healthy condition of oral mucosa and gums as well as the dental supporting tissue
- Before and after implantological and periodontal interventions and dental and orthodontic surgery
- In the event of high caries risk
- In case of restricted ability to perform oral hygiene
- To prevent halitosis

Benefits:

- ✓ Reduction of bacterial growth
- ✓ High level of compliance due to mild taste
- ✓ Suitable for patients who need to avoid alcohol

Delivery forms*

Bottle	1 x 300 ml	760678
	1 x 1000 ml	760677

* May vary from country to country

VivaDent Protecting Gel

Oral care gel containing 0.2% chlorhexidine, 900 ppm fluoride, provitamin D-panthenol and xylitol.

Recommended application:

- As a concomitant measure in the prevention of diseases of the gums, oral mucous membrane and the peri-implant tissue
- As a concomitant measure in the management of inflammatory diseases such as gingivitis, mucositis, denture stomatitis, periodontitis or peri-implantitis
- In the case of elevated germ counts

Benefits:

- ✓ Provitamin D-panthenol and xylitol moisturize and soothe the gums and mucous membrane
- ✓ Smooth consistency – easy dispersion
- ✓ Mild taste

Delivery forms*

Tube	1 x 50 g	760530

Fluor Protector S

Protective fluoride varnish for the desensitization of teeth and protection against dental caries and erosion.

Areas of application:

- Treatment of hypersensitive cervicals
- Build-up of dental enamel resistance against acid
- Long-term caries prevention
- Treatment of sensitivity after tooth whitening

Benefits:

- ✓ 7,700 ppm fluoride in a homogeneous solution
- ✓ Immediate fluoridation of enamel
- ✓ High-yielding fluoride depot
- ✓ Mild taste
- ✓ Suitable for all age groups

Delivery forms*

Refill Tube (var. accessories)	1 x 7 g	639520
	3 x 7 g	602273
Refill Single Dose unit (var. accessories)	20 x 0.26 g	639522

* May vary from country to country

VivaDent Fluoridation Gel

The special gel with calcium, phosphate and fluoride for intensive but gentle dental care.

Recommended application:

- Special dental care to protect against caries, erosive wear and periodontal disease
- Sensitive teeth
- Exposed cervicals
- Acidic diets
- Dry mouth
- During orthodontic treatment
- After professional tooth cleaning
- During tooth whitening

Benefits:

- ✓ Calcium + 1,450 ppm fluoride + phosphate protect the teeth from acid attacks
- ✓ Xylitol inhibits the growth of cariogenic bacteria
- ✓ D-panthenol is soothing to the gums

Delivery forms*

Tube	1 x 7 5ml	760675

Helioseal® F Plus, Helioseal® Clear

Light-curing, resin-based fissure sealants for the preventive sealing of pits and fissures, using the enamel etching technique.

- **Helioseal® F Plus**
Efficient, white-shaded sealant with additional fluoride release
- **Helioseal® Clear**
Transparent sealant for excellent esthetic results and easy monitoring of fissures in case of doubt

Benefits:

- ✓ Precise application
- ✓ Well-proven in many years of clinical use
- ✓ Effective protection against caries

Tooth whitening / Tooth jewellery

VivaStyle® Paint On Plus

A varnish system with 6% hydrogen peroxide for in-office and at-home use. Direct application with a brush - no trays required.

Areas of application:

- Whitening of vital and non-vital teeth

Benefits:

- ✓ Varnish system: for targeted use on the spot
- ✓ D-panthenol: provitamin
- ✓ Whitening: after just seven days
- ✓ In the dental office: intensive treatment

VivaStyle® 16%

A gel containing 16% carbamide peroxide (corresponds to 5.8% hydrogen peroxide) for at-home treatment. Ideal for the effective and gentle whitening of teeth. The product is applied with a customized tray.

Areas of application:

- Whitening of discoloured vital or non-vital teeth

Benefits:

- ✓ Smooth consistency
- ✓ Calibrated, resealable syringe
- ✓ For in-office and at-home use
- ✓ Quick and easy application
- ✓ Pleasant taste
- ✓ Clinically proven

Refill Crystal large, 2.4 mm	5x	559322

Direct Restoratives

Moisture control

OptraGate® 2

The **latex-free** lip and cheek retractor OptraGate® 2 provides optimal support in your daily practice. It offers generous access to the treatment field and facilitates effective and straightforward relative isolation.

This allows you, as a practitioner, to work with greater focus while enhancing the clinical quality and efficiency of your treatments. With OptraGate 2, you will notice that patients remain calmer, swallow less frequently and talk less. Additionally, the extra third ring increases wearing comfort and helps patients to keep their mouth open in a relaxed manner, even during longer treatments.

OptraGate 2 is available in sizes Regular and Small.

Areas of application:

For use in diagnostic, preventive and therapeutic dental procedures that do not require absolute isolation (particularly in adhesive dentistry, such as direct restorative treatments or placing restorations).

Benefits:

- ✓ Relaxed patients and efficient treatments
- ✓ Accessible and manageable treatment field
- ✓ Easy insertion thanks to three-dimensional flexibility, soft material and third ring
- ✓ Versatile application
- ✓ Latex-free

Delivery forms

OptraGate®

The **latex-free** OptraGate® lip and cheek retractor allows the treatment field to be enlarged effectively and comfortably. OptraGate retracts the lips and cheeks evenly around the mouth and thus facilitates moisture control. OptraGate is comfortable to wear as it is three-dimensionally flexible. The improved padding of the lip and cheek retractor as well as the recesses to accommodate the upper and lower lip frenulum increase the patient comfort – even during longer treatment sessions.

OptraGate is available in the sizes Regular, Small and Junior. The colour variations in blue and pink increase the age-appropriate motivation of children and young people and therefore improve patient compliance during the treatment.

Areas of application:

For use in diagnostic, preventive and therapeutic dental procedures that do not require absolute isolation (particularly in adhesive dentistry, such as direct restorative treatments or placing restorations).

Benefits:

- ✓ Efficient treatment and better moisture control
- ✓ Enlarged treatment field and accessibility to the cavity
- ✓ Comfortable to wear for patients
- ✓ Latex-free

OptraGate® Dry Control

OptraGate® Dry Control is a sophisticated saliva ejector with an integrated tongue retractor for reliable and effective relative isolation. Its thought-through design enables effective moisture control and noticeably enhances treatment efficiency: Secure placement in the lower jaw, reliable tongue retraction and enhanced patient comfort minimize interruptions in the treatment workflow. Both you and your patients benefit from relaxed, uninterrupted and time-saving treatment procedures.

Areas of application:

Suitable for use in all dental procedures where relative isolation is sufficient (in particular in adhesive dentistry, e.g. restorative treatments or restoration cementation).

Advantages:

- ✓ Efficient moisture control with up to twice the usual suction due to a suction element with multiple openings and 270° coverage
- ✓ Reliable tongue retractor for improved view and better access to the treatment area
- ✓ Reliable attachment enables autonomous work
- ✓ Swift and stress-free application
- ✓ Maximum patient comfort for relaxed treatments
- ✓ Seamless integration – compatible with all common dental units

Delivery forms

Refill	30x	768787
	60x	768788

OptraDam® Plus

OptraDam® Plus is an anatomically shaped rubber dam for the absolute isolation of the working field. It offers the clinician increased visibility and accessibility. In addition, the device facilitates the evacuation of water spray. OptraDam Plus provides patient comfort and assists in keeping the patient's mouth open due to its three-dimensional flexibility.

Areas of application:

Suitable for use in therapeutic dental procedures for which an absolutely dry and isolated working field is required (e.g. for adhesive cementation, filling therapy and root canal treatments).

Benefits:

- ✓ Easy application thanks to the integrated frame and pre-printed arch template
- ✓ High patient comfort thanks to the flexible, three-dimensional design
- ✓ Simultaneous isolation of both arches thanks to the tension-free placement

Adhesives / Etchants

Adhese® 2

Adhese® 2 is a universal adhesive with both light- and dual-cure properties, suitable for both direct and indirect restorations and all etching techniques. For the first time, the adhesive can now be used in dual-cure mode directly from the unique VivaPen® with the help of the innovative blue DC cannula. This significantly expands the adhesive's field of application, particularly in situations where light access is limited.

- Direct-placed light-curing composite restorations
- Direct-placed build-up filling and core build-ups with light- and dual-curing composites
- Adhesive cementation of indirect restorations with light- and dual-curing luting composites
- Repairs of fractured composite restorations
- Desensitization of hypersensitive cervical areas
- Sealing of prepared tooth surfaces before temporary/permanent cementation of indirect restorations

In combination with blue DC VivaPen cannulas and DC applicators, Adhese 2 can be used entirely without light-curing for

- the adhesive cementation of indirect restorations and endodontic posts using Variolink® Esthetic DC with all etching techniques and
- the adhesive cementation of indirect restorations and endodontic posts using dual-curing luting composites with the etch & rinse technique.

Advantages:

Esthetics

- ✓ Universally applicable for indirect and direct restorations
- ✓ Compatible with all etching techniques

Quality

- ✓ Can be used in light-curing or dual-curing applications – reliable and flexible, also in situations where light access is limited.
- ✓ Predictable, high bond strength (> 25 MPa) on enamel and dentin
- ✓ High moisture tolerance ensures consistently strong adhesion on both dry and moist dentin
- ✓ Integrated desensitizing effect for minimal risk of postoperative sensitivities
- ✓ Free of Bis-GMA

Efficiency

- ✓ Swift and easy direct application in the mouth with the ergonomic VivaPen
- ✓ Efficient and cost-saving VivaPen delivery form: up to 4x more applications per ml compared with conventional bottled adhesives*
- ✓ Occlusal curing in only 3 seconds with the 3s Bluephase PowerCure product portfolio: for Class I and II restorations of permanent posterior teeth
- ✓ Up to 187 single-tooth applications per VivaPen

Adhese® Universal

Adhese® Universal is an universal, single-component, light-cured adhesive for direct and indirect bonding procedures. It features compatibility with all etching techniques: self-etch, selective-enamel-etch and total-etch. Adhese Universal is available in the unique VivaPen® delivery form for fast and convenient direct intra oral application with minimal waste to optimize cost effectiveness.

- Direct-placed light-curing composites and compomer restorations
- Direct-placed core build-ups with light-, self- and dual-curing composites
- Adhesive cementation of indirect restorations with light- and dual-curing luting composites
- Repairs of fractured composite and compomer restorations
- Desensitization of hypersensitive cervical areas
- Sealing of prepared tooth surfaces before temporary/permanent cementation of indirect restorations

Benefits:

Esthetics

- ✓ Universally suitable for direct and indirect bonding procedures and all etching protocols

Quality

- ✓ High bonding strength (>25 MPa) on wet and dry dentin
- ✓ Minimal risk of postoperative sensitivity due to the integrated desensitizing effect

Efficiency

- ✓ Fast and convenient direct intraoral application with the ergonomic VivaPen®
- ✓ Efficient VivaPen delivery form provide almost 4 times more applications per ml compared to conventional bottles*
- ✓ Curing time of only 3 seconds with the 3s PowerCure range of products: for restorations in the posterior region of the permanent dentition (Class I and II) when light-cured from the occlusal aspect
- ✓ Up to 187 single tooth applications with the VivaPen

Adhese® Universal DC

Adhese® Universal DC is a universal, dual-curing single-component dental adhesive for enamel and dentin that is compatible with all etching techniques.

Adhese Universal DC is suitable for direct restorative procedures and the adhesive cementation of indirect restorations.

Adhese Universal DC can be used without light-curing for:

- the adhesive cementation of indirect restorations and endodontic posts with Variolink® Esthetic DC in conjunction with all etching techniques.
- the adhesive cementation of indirect restorations and endodontic posts using dual-curing luting composites in conjunction with the etch & rinse technique.

Esthetics

- ✓ Universally suitable for direct and indirect bonding procedures and all etching protocols

Quality

- ✓ High bonding strength (>25 MPa) on wet and dry dentin
- ✓ Integrated desensitizing effect
- ✓ Offers the same advantages as the clinically proven Adhese Universal, with the added benefit of high bonding strength in conjunction with induced self-curing

Efficiency

- ✓ Curing time of only 3 seconds with the 3s PowerCure range of products: for restorations in the posterior region of permanent dentition (Class I and II) when light-cured from the occlusal aspect. Curing of all types of restorations in only 5 seconds.

Delivery forms

Refill Single Dose unit Regular	25 x 0.1 g	687778WW
Refill Single Dose unit Small/Endo	25 x 0.1 g	687779WW

Excite® F

Excite® F is a light-curing, fluoride-releasing single-component adhesive that is suitable for the total-etch technique.

- Direct light- and dual-cure composite and compomer restorations
- Adhesive luting of indirect restorations involving light-curing

Benefits:

- ✓ Available in bottles and Single Dose units
- ✓ High bond strength values on enamel and dentin
- ✓ Acetone-free (alcohol-based solvent)
- ✓ Fluoride release
- ✓ Storage at room temperature

Delivery forms

Refill		
Bottle	1 x 5 g	759132
Bottle	2 x 5 g	759133
Applicators Regular (light blue)	50x	631699
Single-Dose	50 x 0.1 g	759134

Excite® F DSC

Excite® F DSC is a dual-curing, fluoride-releasing enamel and dentin adhesive that is suitable for the total-etch technique.

- Adhesive cementation of root canal posts
- Adhesive cementation of indirect, metal-free translucent restorations with dual- or self-curing luting composites
- Direct restorations and core build-ups with dual and self-curing composites

Benefits:

- ✓ Patented initiator-coated applicator brush
- ✓ Time-saving: one step, one coat
- ✓ No light-curing necessary
- ✓ High bond strength values on enamel and dentin
- ✓ Single-dose delivery form with applicators in two different sizes: Regular and Small/Endo
- ✓ Storage at room temperature

Delivery forms

Refill		50 x 0.1 g
Regular		630378
Small/Endo		630380

Syntac®

Syntac® is the classic adhesive system for a chemically sound bond between the composite materials and the tooth structure.

- Direct composite and compomer restorations in the anterior and posterior region
- Adhesive cementation of indirect restorations made of composite and ceramic

Benefits:

- ✓ For direct and indirect restorations
- ✓ Clinically proven for many years
- ✓ Reduction of postoperative sensitivity
- ✓ Excellent instant bond between dentin/enamel and composite
- ✓ High bond strength
- ✓ Storage at room temperature

Delivery forms

Assortment		532891
Syntac Primer	1 x 3 g	
Syntac Adhesive	1 x 3 g	
Heliobond	1 x 6 g	
Var. accessories		
Refill Primer	1 x 3 g	532893
Refill Adhesive	1 x 3 g	532892

Heliobond

Heliobond is a light-curing single-component bonding agent to optimize enamel etching with all light-curing restorative materials.

- Adhesive for enamel bonding
- Together with Syntac also dentin bonding agent
- Cementation of tooth jewellery
- Transparent sealing of fissures and restorations
- As a bonding layer for the repair of composite, crown and bridge restorations

Benefits:

- ✓ For an optimum marginal seal between tooth and composite when applied in conjunction with the enamel etch technique.
- ✓ Storage at room temperature

Delivery forms

Refill	1 x 11 g	532906
Refill	1 x 6 g	532907

Total Etch

Total Etch is a 37% phosphoric acid gel.

- Partial etching technique for adhesive restorations
- Total-etch technique for adhesive restorations
- Fissure sealing
- Cementation of brackets and tooth jewellery
- Adhesive cementation

Benefits:

- ✓ The conventional etching gel with balanced handling properties
- ✓ Gel can be easily distinguished from the tooth structure
- ✓ Pre-bent metal tip for accurate application
- ✓ Jumbo delivery forms to keep adequate amounts of gel in stock

Delivery forms

Assortment Total Etch Jumbo		558530
Total Etch Jumbo	1 x 30 g	
Application tips, empty 2-ml syringe		
Refill	2 x 2 g	550588
Refill Etch application tips (blue)	20x	550587

IPS® Ceramic etching gel

The IPS® Ceramic etching gel is used for the creation of retentive bonding surfaces on all-ceramic restorations to prepare for cementation. It enhances the bonding effect between the composite cement and the ceramic bonding surface.

Delivery forms

IPS® Ceramic Etching Gel Kit		531550
IPS Ceramic etching gel	1 x 5 ml	
Neutralization powder	1 x 30 g	
Measuring spoon	1x

Tetric® plus

Tetric® plus is our new simplified universal composite, designed for even easier and more efficient restorative treatments. With just four shades, all four quadrants can be restored in layer thicknesses of up to 4 mm^[1] – thanks to the optimized 4-filler technology in Tetric plus.

Benefits:

Esthetics

- ✓ **4 unique shades for easy shade matching**
 - Exceptional shade matching thanks to an enhanced chameleon effect
 - 81% of dentists give excellent ratings for shade matching
 - Evidence-based shade concept based on natural teeth, covering all 16 classical VITA* shades
 - Easy shade matching for simple and hassle-free shade selection
 - Translucency shift after curing for a natural, enamel-like translucency
 - Excellent polishability for fast application and long-lasting shine

Quality

- ✓ **High-quality material with convincing handling**
 - Very good product properties for reliable curing, high radiopacity, high strength, high bond strength with Adhese Universal and low water absorption
 - Effective shrinkage control technologies
 - Convincing handling characteristics – 90% of dentists express high satisfaction
 - Good adaptation to cavity walls
 - Stable consistency for precise fissure modeling
 - Adjustable viscosity by heating up to 68°C
 - Universal flowable consistency for precise application with 0.9 mm cannulas and efficient volume replacement with 1.2 mm cannulas
 - Tetric plus Flow does not require a covering layer
 - Optimized internal geometry of Tetric plus Flow cannulas prevents air bubbles

Efficiency

- ✓ **Efficiency in 4 mm. Simplicity in 4 shades.**
 - Universal 4-mm composite for all cavity classes
 - Faster workflow: With Bluephase PowerCure, Tetric Plus and Adhese Universal can be light-cured in just 3 seconds
 - Optimized inventory management with fewer shades, reducing stock levels and minimizing expired products in rarely used shades

Tetric® plus Fill

Tetric® plus Fill offers:

- Sculptable viscosity that adapts well to cavity walls
- High satisfaction with the stability of modeled fissures and the cushioning effect
- Adjustable viscosity by heating as needed

Easy heating

You can safely warm Tetric® plus Fill in a dental composite warmer up to 68°C to reduce its viscosity. No worries – the mechanical properties will remain unaffected.

Optimized 4-filler technology

The combination of spherical and non-spherical fillers ensures easy handling and fast polishability – without compromising mechanical properties.

Types of restorations

- Restorations of all kinds in permanent teeth (in posterior teeth, including replacement of individual cusps)
- Reconstructive build-ups
- Restorations in deciduous teeth
- Repairs of composite or ceramic restorations
- Direct veneers
- Sealing of implant screw channels

^[1] Apply the shade A3.5 plus in a maximum layer thickness of 3.5 mm when light curing for 3 or 5 seconds.

^[2] For load-bearing restorations, apply a covering layer of a sculptable composite.

^[3] Suitable for cavity classes I–V according to G. V. Black.

Tetric® plus Flow

Tetric® plus Flow is the flowable simplified universal composite for anterior and posterior restorations.

Tetric plus Flow offers you:

- Universal viscosity thanks to exceptional thixotropic properties
- Precise application with excellent stability
- Good flowability for fast volume replacement
- Adapts to cavity walls with a self-leveling effect
- No additional covering layer required
- Even in 4-mm increments, Tetric plus Flow does not require an additional covering layer^[2]

Did you already know this about the cannulas for Tetric plus Flow?

- ✓ **New and optimized**
Thanks to an improved internal design, air bubbles are no longer an issue
- ✓ **Two sizes for different applications**
 - 0.9-mm cannulas for precise application, e.g. in Class V restorations
 - 1.2-mm cannulas for efficient volume replacement in larger cavities with layer thicknesses of up to 4 mm

Types of restorations

- Restorations in deciduous teeth
- Repairs of composite/ceramic restorations
- Sealing of implant screw channels
- Initial layer up to 4 mm in Class I and II restorations^[3]
- Small direct restorations in permanent teeth (not occlusion-bearing)^[2]
- Liner under direct restorations of all cavity classes
- Class V restorations
- Extended fissure sealings

Tetric® Line

One solution for all cavities

The Tetric® line of products consists of four well-coordinated composite resins for your direct restorative needs.

Tetric® Prime is a sculptable universal composite and **Tetric® EvoFlow®** is a flowable universal composite for anterior and posterior restorations.

Tetric® PowerFill is a sculptable composite and **Tetric® PowerFlow** is a flowable composite for 4-mm bulk placement in the posterior region. It offers short curing times from 3 seconds.

Ivoclar offers a kit containing 4 composites featuring 6 different types of materials that are intuitive to use. With this small range of materials, all types of cavities can be filled.

Each kit comprises:

- ✓ Tetric Prime – sculptable, for conventional layering techniques
- ✓ Tetric EvoFlow – flowable, for conventional layering techniques
- ✓ Tetric PowerFill – sculptable, application in increments of up to 4 mm
- ✓ Tetric PowerFlow – flowable, application in increments of up to 4 mm
- ✓ Adhese® Universal VivaPen – the universal adhesive

Tetric® Prime

Tetric® Prime is a sculptable universal composite for anterior and posterior restorations.

Types of restorations

- Restorations of permanent teeth
- Veneering of discoloured permanent anterior teeth
- Splinting of mobile permanent teeth
- Repairs of composite resin / ceramic restorations in permanent teeth
- Restorations of deciduous teeth
- Light intensities of $>1,300\text{mW/cm}^2$ must be avoided for deciduous teeth.

Benefits:

Esthetics

- Pronounced chameleon effect for a natural shade blend

Quality

- Proven clinical performance with over 730 million restorations placed worldwide ^[1]
- Easy sculpting and contouring due to its low stickiness, good spreadability and creamy consistency ^[2]

Efficiency

- 1 kit for all cavities

Shades:

- Dentin shades: A2, A3.5
- Enamel shades: A1, A2, A3, A3.5, A4, B1, B2, C2
- Highly translucent incisal shade: T
- Bleach shades: Bleach L

^[1] Based on sales figures.

^[2] Tetric Prime offers excellent handling properties.

Starting situation:
Defective mesio-palatal composite

Tetric EvoFlow®

Tetric EvoFlow® is the flowable universal composite for restorations in the anterior and posterior region.

The material can be used as a liner in Class I and II cavities and as a filling material for small and Class V cavities. It is effectively combined with sculptable composite resins, e.g. Tetric Prime, Tetric PowerFill or IPS Empress® Direct.

Types of restorations:

- Initial layer in Class I to Class V restorations
- Class V restorations
- Small restorations of any nature
- Blocking out of undercuts
- Extended fissure sealing
- Repairs of composite resin restorations
- Light intensities of $>1,300\text{mW/cm}^2$ must be avoided for deciduous teeth.

Benefits:

Esthetics

- ✓ Pronounced chameleon effect for a natural shade blend

Quality

- ✓ Excellent handling properties to suit every situation

Efficiency

- ✓ 1 kit for all cavities

Shades:

- Dentin shades: A2, A3.5, B2
- Enamel shades: A1, A2, A3, A3.5, A4, B1, B3
- Highly translucent incisal shade: T
- Bleach shades: Bleach XL, Bleach L, Bleach M

Tetric® PowerFill

Tetric® PowerFill is a sculptable, light-curing, radiopaque 4-mm composite for direct restorative treatments in posterior teeth. It offers short curing times from 3 seconds.

Types of restorations:

- Restorations of permanent posterior teeth (Classes I and II)
- Restorations of deciduous posterior teeth (Classes I and II)
- Reconstructive build-ups, when light-cured at a light intensity of $\leq 1,300 \text{ mW/cm}^2$
- Light intensities of $>1,300 \text{ mW/cm}^2$ must be avoided for deciduous teeth.

Benefits:

Esthetics

- ✓ True-to-nature esthetics for posterior restorations
- ✓ Ivocerin® and the Aessencio® technology allow you to achieve the same high esthetics as with conventional composites

Quality

- ✓ Reliable polymerization of layers of up to 4 mm
- ✓ Low susceptibility to process-related air entrapments
- ✓ Easy modelling of anatomical structures due to its low stickiness

Efficiency

- ✓ Time savings of up to 51% in the posterior region^[1]

Shades:

Three enamel-like universal shades

- ^{IV}A Universal A shade
- ^{IV}B Universal B shade
- ^{IV}W White for light-coloured permanent teeth

Tetric® PowerFlow

Tetric® PowerFlow is a flowable, light-curing, radiopaque 4-mm composite for direct restorative treatments in posterior teeth. It offers short curing times from 3 seconds.

Types of restorations:

- Initial layer / increment in the restoration of permanent posterior teeth (Classes I and II)
- Restorations of deciduous posterior teeth (Classes I and II).
- Light intensities of $>1,300\text{mW/cm}^2$ must be avoided for deciduous teeth.

Benefits:

Esthetics

- ✓ True-to-nature esthetics for posterior restorations
- ✓ Ivocerin® and the Aessencio® technology allow you to achieve the same high esthetics as with conventional composites

Quality

- ✓ Reliable polymerization of layers of up to 4 mm
- ✓ Low susceptibility to process-related air entrapments

Efficiency

- ✓ Good adaptation to cavity walls and easy handling due to its outstanding flow properties
- ✓ Time savings of up to 51% in the posterior region^[1]

Tetric EvoCeram®

Tetric EvoCeram® is a sculptable universal composite for restorations in the anterior and posterior region.

Types of restorations:

- Veneering of discoloured permanent anterior teeth
- Splinting of mobile permanent teeth
- Repairs of composite resin / ceramic restorations in permanent teeth
- Build-ups for transparent, removable orthodontic aligners for permanent teeth
- Reconstructive build-ups
- Restorations of deciduous teeth
- Light intensities of $>900\text{mW}/\text{cm}^2$ must be avoided for deciduous teeth.

Benefits:

Esthetics

- ✓ Chameleon effect for a natural shade blend

Quality

- ✓ Proven clinical performance with over 730 million restorations placed worldwide ^[1]

Efficiency

- ✓ One solution for all cavities

Shades:

- Dentin shades: A2, A3.5, A4, B2
- Enamel shades: A1, A2, A3, A3.5, A4, B1, B2, B3, C1, C2, C3, D2, D3
- Highly translucent incisal shade: T
- Bleach shades: Bleach XL, Bleach L, Bleach M, Bleach I

IPS Empress® Direct

IPS Empress® Direct is a highly esthetic composite for filling cavities in anterior and posterior teeth. It is available in five different translucency levels and in 32 different tooth shades.. Therefore, different types of anatomical features can be faithfully reproduced.

Types of restorations:

- Anterior restorations (Classes III, IV)
- Posterior restorations (Class I and II)
- Class V restorations
- Correction of tooth position and tooth shape (e.g. diastema closure, closure of interdental triangles, lengthening of incisal edges);
- Direct veneers

Benefits:

Esthetics

- ✓ Lifelike shades for natural-looking restorations
- ✓ Easy application of shade nuances with Trans Opal

Quality

- ✓ Long-lasting esthetic results
- ✓ Convenient handling for sophisticated requirements

Efficiency

- ✓ Intuitive layering technique to achieve highly esthetic results in a few easy steps

Shades

- Dentin shades (Dentin):
A1, A2, A3, A3.5, A4, IVA5, IVA6, B1, B2, C3, D2, Bleach L, Bleach XL
- Enamel shades (Enamel):
A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C1, C2, C3, D2, D3, Bleach L, Bleach XL
- Translucent: Trans 20, Trans 30, Trans Opal

IPS Empress® Direct Effect

The flowable characterization material IPS Empress Direct Effect enables creative users to impart each restoration with an individual touch.

Types of restorations:

- Creating lifelike esthetic effects in the incisal area
- Anterior restorations (Classes III, IV)
- Small restorations of all types
- Repair of composite/ceramic veneers

Benefits:

- ✓ Ideal addition to the IPS Empress Direct range of materials for the creation of special effects in the anterior region
- ✓ Unique Trans Opal shade for a lifelike esthetic opalescence
- ✓ Lifelike translucency for the optimum reproduction of the incisal area
- ✓ Ideal consistency for contouring with the brush

Shades:

Trans Opal

Delivery forms

Refill syringe	1 x 1.8 g	
Trans Opal		635342
Application tips ø 0.9 mm (black)	20x	634849

IPS Empress® Direct Color

For the lifelike characterizations, such as the imitation of enamel cracks.

Types of restorations:

- Individualized characterization of direct and lab-fabricated composite restorations
- For the masking of tooth discolourations
- For the characterization of chairside CAD/CAM veneers

Benefits:

- ✓ Lifelike characterization of demanding composite restorations and CAD/CAM-fabricated restorations
- ✓ User-friendly direct application; no dilution required
- ✓ High masking capability even when applied in thin layers
- ✓ 0.4-mm tip for precise application
- ✓ Ideally complements the IPS Empress® Direct and IPS Empress CAD range of materials

Shades:

White, honey, ochre, brown, blue, grey

Delivery forms

Refill	Possible use	1 x 1 g
white	<ul style="list-style-type: none"> • Imitation of white spots • Simulation of halo effects • Accentuation of cusps and ridges 	637899
honey	<ul style="list-style-type: none"> • Accentuation of the dentin core • Accentuation of fissures 	637900
ochre	<ul style="list-style-type: none"> • Imitation of individual enamel characteristics 	637903
blue	<ul style="list-style-type: none"> • Simulation of translucent enamel areas • Imitation of opalescent areas 	637901

Application tips ø 0.4 mm (black)	20x	634847

IPS Empress® Direct Opaque

IPS Empress® Direct Opaque is a light-curing opaquer suitable for masking exposed metal surfaces and discolourations.

Types of restorations:

Masking of:

- exposed metal surfaces when repairing defective ceramic and composite veneers intraorally
- discoloured tooth structure

Benefits:

- ✓ High masking capability even when applied in thin layers
- ✓ Universal opaque shade renders shade adjustments unnecessary

Shade:

Opaque

Alkasites

Cention® Forte & Cention® Primer

Cention Forte is a self-curing, radiopaque filling material with light-curing option for the direct restorative treatment of anterior and posterior teeth. Cention Forte belongs to the materials group of alkasites.

This filling material is considered to be the better alternative to amalgam than glass ionomer cement because of its reduced application protocol, high flexural strength and lifelike esthetics.

The alkaline filler of the material releases bioactive calcium ions, fluoride ions and hydroxide ions, which prevents demineralization and supports remineralization.

The ion release is much higher at an acidic pH value than it is at a neutral pH value. Acid attacks are thus neutralized much more quickly.

Cention Primer is a self-etching, self-curing primer for dental hard tissue, that has been especially designed for Cention Forte.

Delivery forms

Cention Forte Kit		740829
Cention Forte Capsule	50 x 0.3 g	
Cention Primer	1 x 6 g	
Cention Forte Start		740831

Base/liner

Vivaglass® Liner

Light-curing glass ionomer cement suitable for cavity lining.

Benefits:

- ✓ Continuous fluoride release
- ✓ Good dentin adhesion
- ✓ Good radiopacity
- ✓ Easy handling due to light-curing

Clinical accessories

OptraSculpt® Next Generation

OptraSculpt® Next Generation is a contouring instrument for the efficient contouring of composite restorations in the posterior region.

The two-component attachments produced in a special procedure facilitate the modelling of smooth and esthetic high-quality filling surfaces. The attachment shapes are specifically designed for the posterior region and allow for a natural-looking recreation of anatomical tooth structures such as cusp slopes, fissures and proximal margins.

Areas of application:

Suitable for adapting, shaping and contouring of uncured sculptable composite materials. Also suitable for lab composites.

Benefits:

- ✓ Three attachment shapes for the professional creation of demanding anatomical structures
- ✓ Optimum working angle for the posterior region
- ✓ Hygienic dispenser box for easy access to attachments

OptraSculpt® Pad

OptraSculpt® Pad is a contouring instrument with special foam pad attachments designed for the efficient, non-stick contouring and shaping of composites. The highly flexible synthetic foam pads optimally adjust to the anatomical contours and allow smooth modelling, without leaving any unwanted marks on the composite restoration.

Areas of application:

Suitable for adapting, shaping and contouring of uncured sculptable composite materials. Also suitable for lab composites.

Benefits:

- ✓ Anti-stick effect: reduced adhesion of the composite to the instrument
- ✓ Professional esthetics due to homogeneous surface design and reference scales on the instrument handle
- ✓ Reduced effort required for finishing and polishing

Reference scale on the instrument handle:
The continuous vertical lines show ideal average tooth widths, the dotted vertical lines average esthetic axial inclinations of the maxillary anterior teeth.

Silamat® S6

Form and function – perfectly mixed

Areas of application:

Modern universal mixer for amalgam, glass ionomer cements and other predosed dental materials in capsules and injection capsules.

Benefits:

- ✓ Attractive design for the modern dental practice
- ✓ Thanks to its rounded shape and the removable cover, the unit can be cleaned easily
- ✓ Tried-and-tested Silamat technology
- ✓ Above-average speed of 4,500 rpm
- ✓ Special figure-of-eight pattern and patented mixing fork
- ✓ Compatible with all popular capsules and injection capsules in various shapes and sizes
- ✓ Three-year warranty
- ✓ Voltage 100 – 240 VAC

Delivery forms

Silamat® S6	100 – 240 VAC	602286

Light-polymerization units

Bluephase® PowerCure

The high-performance Bluephase® PowerCure features a light intensity of up to 3,000 mW/cm² and enables extremely short exposure times starting from 3 seconds.

Area of application:

Curing light for the polymerization of all popular light-curing dental materials in the wavelength range of 385–515 nm.

Benefits:

- ✓ Light intensity of up to 3,000 mW/cm² in the 3s Cure program for extremely short exposure times starting from 3 seconds
- ✓ Very short curing times from 3 seconds help save time and heighten efficiency (in conjunction with Adhese Universal, Tetric PowerFill and Tetric PowerFlow)
- ✓ Integrated intelligent Polyvision light-curing assistant
- ✓ Polywave LED with broad wavelength range of 385–515 nm, suitable for all popular dental materials
- ✓ Four programs:
 - 3s Cure: 3,000 mW/cm² – 3 seconds
 - Turbo: 2,000 mW/cm² – 5 seconds
 - High: 1,200 mW/cm² – 10, 15, 20 seconds
 - PreCure: 2 seconds
- ✓ PreCure program for the clean-up of excess cement
- ✓ Click&Cure corded operation for battery-independent use; includes radiometer
- ✓ Cordless design for ultimate mobility
- ✓ 10>9-mm light guide
- ✓ Short light guide: all tooth surfaces can be easily reached without the patient having to open their mouth extra wide
- ✓ Inductive charging prevents soiling of the charging contacts of the battery
- ✓ Battery status is visible from a far distance due to the clear charging indicator on the charging station
- ✓ High-performance lithium ion battery for a total of 20 minutes of operation in the HIGH mode
- ✓ Uniform polymerization due to homogeneous distribution of light throughout the entire light emission window of the light guide
- ✓ Backlit display
- ✓ Radiometer integrated in the charging station (optional)
- ✓ 3-year warranty (1-year warranty for battery)
- ✓ Available in grey

Bluephase® G4

Bluephase® G4 is the first Bluephase LED curing light featuring the personal and patented assistance system Polyvision.

Area of application:

The LED curing light of the 4th LED generation with a light intensity of 1,200 mW/cm² is used for the polymerization of all light-curing dental materials curing in the wavelength range of 385 – 515 nm.

Benefits:

- ✓ Integrated intelligent Polyvision light-curing assistant
- ✓ Broad wavelength range of 385 – 515 nm, suitable for all popular dental materials
- ✓ High light intensity of 1,200 mW/cm² for short exposure times starting from 10 seconds
- ✓ PreCure program for the removal of excess cement
- ✓ Click&Cure corded operation for battery-independent use
- ✓ Cordless design for ultimate mobility
- ✓ 10-mm light guide for time-saving one-time exposure
- ✓ Short light guide: all tooth surfaces can be easily reached without the patient having to open their mouth extra wide
- ✓ Inductive charging prevents soiling of the charging contacts of the battery
- ✓ Charging base with charging indicator permits recognition of the charging status from large distances
- ✓ High-performance lithium ion battery for a total of 20 minutes of operation in the HIGH mode
- ✓ Uniform polymerization due to homogeneous distribution of light throughout the entire light emission window of the light guide
- ✓ Backlit display
- ✓ Radiometer integrated in the charging station (optional)
- ✓ 3-year warranty (1-year warranty for battery)
- ✓ Available in grey, green, pink, blue

Bluephase® EasyCure

Bluephase® EasyCure is designed for the intraoral polymerization of light-curing dental materials. The device offers a slim yet effective solution with user-friendly, one-button operation for easy handling.

Area of application:

As a 4th-generation LED device with a light intensity of 1200 mW/cm², Bluephase® EasyCure is ideal for the efficient polymerization of all light-curing dental materials within a wavelength range of 385–515 nm.

Benefits:

- ✓ Easy operation with just one button
- ✓ High intensity to cure all types of restorations
- ✓ Wide, rotatable light guide
- ✓ Cordless design for maximum mobility in the dental practice
- ✓ Uniform polymerization due to homogeneous distribution of light
- ✓ Reliable polymerization and curing results
- ✓ Compatible with all common dental photoinitiators and materials without restrictions thanks to Polywave technology
- ✓ Low heat generation to protect the pulp
- ✓ Backlit display for optimal hygiene
- ✓ Inductive battery charging eliminates contaminated charging contacts
- ✓ Consistent light intensity throughout its 5-year lifespan

Delivery forms

Bluephase EasyCure 100-240 V	1x	762137
------------------------------	----	--------

Bluephase® Meter II

The dental radiometer

Bluephase® Meter II is a precise dental radiometer for the quick and easy verification of the light intensity of all types of curing lights.

Area of application:

Enables exact and unrestricted verification of the light intensity in [mW/cm²] and the light output in [mW] of all curing lights in the wavelength range of 380 – 550 nm with an accuracy tolerance of ±10% as compared to the measurement with an integrating sphere.

Benefits:

- ✓ Innovative measuring principle offering an unprecedented measuring accuracy for dental radiometers
- ✓ Universally applicable for any curing light (halogen, plasma, LED devices, etc.)
- ✓ Integrated template to determine the diameter of circular light guides between 6–12 mm
- ✓ Additional program to determine the light output in milliwatt [mW] analogue to an integrating sphere
- ✓ Digital display
- ✓ Ergonomic and modern design
- ✓ 3-year warranty

Polishers

OptraGloss®

Efficient and advanced universal polishing system for the high-gloss polishing of composite filling materials and ceramic materials. A high-gloss finish and smooth surfaces are achieved in only one working step for composites and in only two steps for ceramics. OptraGloss polishers can be autoclaved and re-used.

Shapes:

- Flame PP
- Cup PP
- Lens PP
- Flame HP
- Cup HP
- Lens HP
- Spiral wheel HP

Areas of application:

- Clinical polishing of glass-ceramic, feldspathic-ceramic and oxide-ceramic restorations
- Clinical polishing of composite resin restorations

Benefits:

- ✓ Radiant high-gloss restoration surfaces in no time
- ✓ High wear resistance
- ✓ Autoclavable and reusable
- ✓ Two-step polishing system for ceramics

OptraGloss® Extra Oral

OptraGloss® Extra Oral is a universal two-step polishing system for extraoral use, which can be supplemented with an optional polishing paste. In just a few minutes, unpolished restorations can be polished to a high gloss. The polishers are ideal for finishing oxide ceramics and glass-ceramics, such as IPS e.max ZirCAD Prime, IPS e.max CAD, IPS Empress CAD und PMMA such as e.g. Telio CAD and Compositen such as e.g. Tetric CAD.

Shapes:

- Disc
- Flame
- Spiral Wheel

Areas of application:

For polishing zirconium oxide (e.g. IPS e.max ZirCAD Prime) and glass-ceramics (e.g. IPS e.max CAD, IPS Empress CAD):

- Step 1: Pre-polishing with OptraGloss Extra Oral PP (dark blue).
- Step 2: High-gloss polishing with OptraGloss Extra Oral HP (light blue)
- Optional: Polishing with OptraGloss Extra Oral Polishing Paste together with a goat-hair brush.
- Use only the light blue polishers for polishing PMMA (e.g. Telio CAD) or composites (e.g. Tetric CAD)

Benefits:

- ✓ Suitable for oxide- and glass-ceramics – zirconium oxide in the sintered and unsintered state, lithium disilicate before and after crystallization – as well as PMMA and composite
- ✓ Easy and efficient application
- ✓ Cost-effective due to long service life and additional time savings in the workflow

Registration devices

UTS 3D universal transfebow system

This system permits skull/joint-related orientation of models into the Stratos articulators according to patients' individual data. The UTS 3D transferbow is adjustable according to the Frankfort Horizontal (FH) or Campers Plane (CP). The 3D registration joint can be rapidly and precisely fixed with only one tommy screw. The use of lightweight carbon-fibre components and an exchangeable nose pad ensure high wearing comfort.

UTS support pins type II

The UTS support pin type II enables a direct, individual model transfer from the transferbow to the articulator.

Delivery forms

UTS support pins type II		536400
Base part	1x	
Pins	2x	
Various accessories		

Gnathometer M incl. UTS adapter

Gnathometer M incl. UTS adapter is an intraoral registration device according to Prof. Dr Böttger for the determination of occlusal positions of edentulous patients. The Gnathometer M is equipped with an adapter to connect it to the UTS 3D transferbow.

Delivery forms

Gnathometer M (complete)		1x	530484
--------------------------	--	----	--------

Centric Tray

Centric Tray is an impression tray for the time-saving determination of jaw relations in complete and partial denture prosthetics. In combination with UTS CAD you can determine the occlusal plane during the first appointment.

Delivery forms

Centric Tray			559166
Centric Tray	1x		
Regular supports	3x		
Supporting wings	3x		

Preparation and registration in the Digital Denture workflow

The fabrication of complete dentures using CAD/CAM technology requires specific instruments along the process chain. The workflow starts with impression taking and the recording of the patient situation using several clinical auxiliary tools for optimized individual data recording. This information is transferred to the design software and is subsequently included in the design of the denture.

Gnathometer CAD

Gnathometer CAD is an intraoral needle point tracing apparatus to determine the individual centric jaw joint position in edentulous patients.

The registration plates feature special click connections. This mechanism allows occlusal rims and registration plates to be attached and removed very easily in order to carry out the different working steps. For digitization, the registration is placed in the scanner by means of a special impression holder.

- ✓ Material registration plates: stainless steel
- ✓ Material occlusal rims: white POM
- ✓ Material fixation plates: clear PMMA
- ✓ Adjustment of the height of the stylus: 5 mm
- ✓ Weight: 29 g

Delivery forms

Registration plate upper	1x	
Registration plate lower	1x	
Occlusal rim	2x	
Fixation plate	1x	
Fixation screw	1x	
Washer	1x	
Stylus	1x	

Accessories

Occlusal rims for Gnathometer CAD	10 pcs	687681
Fixation plates for Gnathometer CAD	5 pcs	687682

UTS CAD

UTS CAD is a registration device for measuring the angle of the occlusal plane in relation to Camper's plane (CP) and the bipupillary line (BP).

The measured angle or deviation of the occlusal plane from CP / BP can be transferred to the design software to reproduce the correct position of the occlusal plane in the design of the denture.

- ✓ Material metal parts: anodized aluminium, stainless steel
- ✓ Material side arms: carbon fibre composite material, NBR (nitrile rubber)
- ✓ Adjustment possibilities: CE angle $+20^{\circ}$ to -30°
BP angle $\pm 15^{\circ}$
- ✓ Side length basic bow: 200 mm
- ✓ Width basic bow: front 155 mm, back 225 mm
- ✓ Weight: 98 g (incl. bite fork)

Milling machines and software

PrograMill® PM7

If you are looking for efficiency and performance, then the high-performance PrograMill® PM7 is the right choice for you. This machine is suitable for a versatile variety of materials and applications in wet and dry milling processes.

Equipped with a high-performance spindle, the high-power 5-axis milling machine efficiently produces restorations that are distinguished by their outstanding surface quality and excellent accuracy of fit.

Ivoclar Monitoring

Ivoclar Monitoring lets you monitor your Ivoclar lab equipment from anywhere. Receive real-time updates and push notifications from G2 devices of the PrograMill and Programat series.

* Smart, transparent and free of charge.
Available free of charge in the App store

PrograMill® PM3

High precision and consistent results are the distinguishing features of the PrograMill® PM3. This 5-axis milling machine provides great flexibility. It can process a diverse range of materials for a versatile spectrum of applications in both wet and dry operation.

The PrograMill PM3 is more than an entry-level dental mill: It offers technical sophistication, intuitive operation and high-quality results.

PrograMill Filtercartridge for Tank (replacement)	1 pc.	689980

PrograMill® Base

The PrograMill Base combines function and esthetics. The modern base cabinet integrates a powerful and low-noise coolant system – the optimal foundation for the PrograMill milling machines PM7, PM5 and PM3. The PrograMill Suction Unit has different filter levels for filtering harmful particles. The PrograMill Tank has a capacity of 15 litres and automates the wet processing procedure. The drawer includes a specifically designed insert for accommodating materials, tools and accessories.

PrograMill® DRY

PrograMill® DRY is a compact 5-axis dry milling machine and combines coordinated processes with high-quality materials, mature technologies and comfortable handling.

Thanks to its compact design, the mill scores highly on flexibility. The machine manufactures crowns and bridges from zirconium oxide and innovative digital denture solutions from PMMA materials, such as full dentures from the Ivotion discs.

The mill also features a quick clamping system that can be operated with just one hand and without the need for additional tools, making changing materials intuitive and simple.

CAM software

The CAM software presents the interface between the design software and the milling machine and plays a crucial role. The CAM software converts design data into milling data and calculates the required milling paths. The milling strategies have a decisive influence on the quality and accuracy of fit of the restorations and can be flexibly adjusted to meet customer needs.

PrograMill® CAM 2024

The software PrograMill CAM V4, which is adapted to the PrograMill® milling machines, utilizes the entire potential of the milling machines. The software is distinguished by its very short calculation times and the 5-axis simultaneous control of the machine.

Includes all necessary licences for the PrograMill milling machines

- ✓ Milling and grinding Ivoclar materials included
- ✓ Wet processing of IPS e.max CAD included
- ✓ Open for third-party materials
- ✓ Flexible upgrade options

Block Module (part of Ivoclar Workplace)

The Ivoclar Block Module CAM software was specifically developed for processing Ivoclar blocks with the PrograMill PM7 milling machine.

Optimized grinding times for IPS e.max CAD, IPS Empress CAD and Tetric CAD result in higher productivity and help expedite patient treatment. Automated nesting and pinning as well as fast calculation of the tool path lead to a faster and more efficient workflow. The new adaptive grinding technology enables intelligent control of the tool path, resulting in faster processing in outstanding surface quality.

The Block Module is available via Ivoclar Workplace. All information about Ivoclar Workplace is available on this landing page:

<https://www.ivoclar.com/block-module>

PrograMill® material holders

Powerful holders for the PrograMill® machines PM7, PM5 and PM3 have been developed to ensure optimum processing of Ivoclar Digital CAD/CAM materials.

PrograMill® disc holder

A powerful holder has been developed for the PrograMill machines PM7, PM5 and PM3, which is distinguished by its zero-point clamping system. It ensures the optimum processing of discs with a circumferential groove of 10 mm.

The secure fit of all material discs results in high-quality milling results.

Delivery forms

PrograMill® disc holder for PM7/PM5/PM3	1 pc.	689242
---	-------	--------

Digital Denture holder

A special ring has been developed to modify the PrograMill disc holder for the Digital Denture process. It allows Ivotion to be secured in a predefined position and an already processed disc to be re-positioned accurately.

A denture, which has already been milled from the upper side, can therefore be easily removed so that the prefabricated teeth can be adhesively secured in place and then re-positioned for further processing.

Delivery forms

---	-------	--------

IPS e.matrix®

The patented multi-holder IPS e.matrix for PM7/PM5/PM3 enables up to six blocks to be milled in one grinding sequence, depending on the block size.

The IPS e.matrix for PM7/PM5/PM3 can be easily removed from the materials magazine and can be conveniently loaded outside the unit. The multi-holder is ideally adapted to the PrograMill machining strategies.

CAD/CAM blocks

IPS e.max® CAD

Lithium disilicate glass-ceramics (LS₂)

IPS e.max® CAD is the best-selling glass-ceramic^[1] worldwide. The material enables the efficient fabrication of full-contour restorations. It is distinguished by its flexibility, versatile field of applications and processing options and its high strength of 530 MPa.^[2]

Both its esthetic properties and durability have been confirmed in everyday clinical practice.^[3-5]

Processing options:

"Blue" restorations can be:

- polished and crystallized
- glazed and crystallized in a single step
- stained, glazed and crystallized in a single step

Types of restorations:

- Minimally invasive crowns (1 mm)^[6]
- crowns
- Three-unit bridges (up to the second premolar as the terminal abutment)
- Implant-supported hybrid abutment restorations (hybrid abutments^[7], hybrid abutment crowns)
- Veneers and occlusal veneers
- Inlays, onlays, partial crowns

Benefits:

- ✓ Excellent esthetics and high flexural strength of 530 MPa^[2]
- ✓ 95.2% average survival rate over a period of 15 years^[8]
- ✓ Efficient grinding of posterior crowns in only 08:07 minutes^[9]
- ✓ Speed crystallization in 11:10 minutes in the Programat® CS6^[10] or 14:10 minutes in the CEREC® SpeedFire
- ✓ Broad spectrum of restorations for your chairside CAD/CAM applications
- ✓ 10-year guarantee
- ✓ Suitable for conventional, adhesive or self-adhesive cementation techniques

Block sizes^[7]:

- 6 (I12, C14, C16, B32, B40 and B40 L) and 2 abutment block sizes (A14, A16)

Translucency levels^[7]:

- 4 levels and 2 Impulse blocks (HT – High Translucency, MT – Medium Translucency, LT – Low Translucency, MO – Medium Opacity)

Shades^[7]:

- Comprehensive range of shades: in A–D and BL shades (the range of shades varies depending on the translucency level), see pages 64–69.

Given their high translucency, HT blocks are ideally suited for the fabrication of small restorations (e.g. inlays, onlays). Restorations made from HT blocks demonstrate high translucency and are used for restorations that require more brightness than HT restorations and more brightness than HT restorations.

IPS e.max® ZirCAD Prime Block for CEREC®/inLab®

Zirconium oxide ceramic (ZrO₂)

IPS e.max® ZirCAD Prime for CEREC®/inLab® is a zirconium oxide block designed for the fabrication of fixed, full-contour restorations in the anterior and posterior regions. IPS e.max® ZirCAD Prime enables the production of high-strength zirconium oxide restorations (1100 MPa^[1]), which can be speed-sintered^[2] faster than ever in a sintering furnace such as the Programat CS6 or CEREC SpeedFire – without compromising on quality or esthetics.

IPS e.max ZirCAD Prime restorations can be efficiently cemented conventionally with ZirCAD® Cement, or alternatively, self-adhesively (e.g. SpeedCem® Plus) or adhesively (e.g. Variolink® Esthetic).

The perfectly coordinated Ivoclar products support daily practice by enabling an even more efficient and streamlined chairside workflow, allowing IPS e.max ZirCAD Prime restorations to be fabricated in a single session.

Versatile processing options:

Before sintering:

- Polishing with OptraGloss® Extra Oral

After sintering:

- Polishing with OptraGloss® Extra Oral, OptraGloss®
- Glazing with IPS e.max® CAD Crystall./Glaze Paste Fluo
- Characterization with IPS e.max® CAD Crystall./materials

Types of restorations:

Crowns

Benefits:

- ✓ Fast: Speed-sintering of restorations in just 15 minutes in the CS6 or 16 minutes in the CEREC® SpeedFire furnace^[2]
- ✓ High-strength: With a strength of 1100 MPa^[1], wall thicknesses for crowns can be reduced to 0.8 mm
- ✓ Esthetic: Natural progression of shade and translucency from dentin (3Y-TZP raw material) to the translucent incisal area (5Y-PSZ raw material)
- ✓ Flexible: Easy and quick conventional cementation with ZirCAD® Cement; alternatively, choose between self-adhesive and adhesive cementation

Available block:

C17 for single-tooth restorations

Shade overview:

Available in 11 shades: BL1, BL3, 0*, A1, A2, A3, A3.5, B1, B2, C2, D2

All 11 shades are included from CEREC® Software version 5.2.10* onward.

IPS e.max® ZirCAD

Zirconium oxide ceramics (ZrO₂)

IPS e.max® ZirCAD allows dental professionals to produce esthetic, monolithic zirconia restorations efficiently in the dental practice with the help of efficient speed sintering programs.

Two groups of materials combined into one – this is what makes IPS e.max ZirCAD MT Multi special: translucent 5Y-TZP zirconium oxide provides high translucency for the incisal zone and the more opaque 4Y-TZP zirconium oxide provides high stability in the dentin zone.

In addition, the material features a gradual progression of shade and translucency, consisting of 60% dentin, 20% transition and 20% incisal zone. This distribution reflects the natural progression from dentin to incisal and imparts natural esthetic appearance to the restorations, even if no characterizations are applied^[3].

Processing options:

After the sintering procedure, restorations can be

- glazed and fired
- optionally: stained, glazed and fired
- polished

Types of restorations:

- Crowns
- Three-unit bridges

Benefits:

- ✓ High strengths of 1200 MPa (LT^[1]) and 850 MPa (MT Multi^[2]) allow reduced wall thicknesses and conservative preparation methods.
- ✓ Natural progression of shade and translucency deliver true-to-nature esthetic results in conjunction with MT Multi^[3]
- ✓ Natural fluorescence can be achieved with IPS e.max CAD Crystall./Glaze Fluo paste^[3]
- ✓ Conventional, adhesive or self-adhesive cementation

Block sizes:

- 2 (C17 and B45)

Translucency levels:

- 1 and 1 MT Multi block (MT Multi – Medium Translucency, LT – Low Translucency)

Shades:

- 8 (BL or BL1, A1, A2, A3, B1, B2, C2, D2)

Authorized CAD/CAM systems:

- ✓ **Dentsply Sirona:**
 - inLab® MC XL
 - CEREC® MC / MC X / MC XL / Primemill
- ✓ **Planmeca:**

IPS Empress® CAD

Leucite glass-ceramics

IPS Empress® CAD restorations have been in clinical use for decades. It closely reproduces the natural tooth structure due to its distinct chameleon effect and lifelike fluorescence.^[1]

IPS Empress CAD is known for exceptional esthetics and can be polished to a high gloss quickly and easily: grind – polish – done.

The innovative polychromatic IPS Empress CAD Multi block is a special highlight in this range. The block features a natural progression of shade and fluorescence from dentin to incisal.^[1]

Delivery forms

Refill IPS Empress® CAD blocks

see p. 75

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: stained, glazed

Types of restorations:

- Crowns
- Inlays, onlays, partial crowns
- Veneers

Benefits:

- ✓ Highly esthetic restorations, efficiently created
- ✓ Material with a flexural strength of 185 MPa^[2] that has been in clinical use for decades
- ✓ Optimum adjustment to the natural tooth structure due to the chameleon effect

Block sizes:

- 4 (I10, I12, C14, C14 L)

Translucency levels:

- 2 and Multi block (HT – High Translucency, LT – Low Translucency)

Tetric® CAD

Composite

Tetric CAD is an esthetic composite block for the efficient fabrication of single-tooth restorations (flexural strength: 272 MPa^[1]).

Due to the pronounced chameleon effect, Tetric CAD restorations blend in with the residual tooth structure in an optically pleasing manner.^[2]

The restoration is polished after milling and then seated using an adhesive cementation protocol. This processing technique is very efficient and leads to an esthetic result quickly and easily.

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: characterized

Types of restorations:

- Veneers
- Inlays
- Onlays (e.g. occlusal veneers, partial crowns)
- Crowns

Benefits:

- ✓ Natural integration into the oral environment due to the unique chameleon effect²¹
- ✓ Excellent polishability and intraoral repairability
- ✓ Easy and efficient processing
- ✓ Stability in limited layer thicknesses; restorations with thinly tapered margins possible
- ✓ Durable bond due to coordinated luting system

Block sizes:

- C14

Translucency levels:

- 2 (HT – High Translucency, MT – Medium Translucency)

Shades:

- 5 (BL, A1, A2, A3, A3.5; the shade offering varies, depending on the translucency level)

Telio® CAD

Cross-linked PMMA material

Telio CAD are cross-linked PMMA blocks for the efficient fabrication of long-term temporaries (flexural strength: 135 MPa^[1]).

As a result of an optimized manufacturing process, the restorations feature a smooth surface that can be quickly and efficiently polished.

Processing options:

After the milling process, the restorations can be

- polished
- optionally: characterized

Types of restorations:

- Temporary crowns
- Temporary bridges with up to two connected pontics
- Implant-supported temporary hybrid abutment crowns

Benefits^[4]:

- ✓ High material homogeneity and process reliability result in fewer mixing errors and air entrapments compared with conventional methods
- ✓ Durable shade stability and lifelike fluorescence^[2]
- ✓ Excellent polishability
- ✓ Economical fabrication of temporaries

Block sizes:

- 3 (A16, B40 L, B55)

Translucency levels:

- 1 (LT – Low Translucency)

Shades:

Implant prosthetics

From temporary to permanent restoration

The IPS e.max® CAD and Telio® CAD blocks feature a pre-fabricated interface to facilitate direct cementation to a titanium bonding base. So, implant-supported hybrid abutments and hybrid abutment crowns can be created at chairside using clinically proven products^[1-4].

Cementation is achieved with the self-curing Multilink® Hybrid Abutment luting composite.

Types of restorations:

- **Telio CAD**
Implant-supported temporary hybrid abutment crowns
- **IPS e.max CAD**
Implant-supported hybrid solutions (hybrid abutments, hybrid abutment crowns)^[4]

Benefits:

- **Telio CAD**
 - ✓ Straightforward design of the emergence profile^[3, 4]
 - ✓ Visualization of the permanent prosthetic solution
- **IPS e.max CAD^[4]**
 - ✓ Esthetic restoration due to tooth-coloured hybrid abutments
 - ✓ Hybrid abutment crown (2-in-1) offers functionality and efficiency^[1, 3]
 - ✓ Good biocompatibility with oral soft tissues^[1]

Block sizes:

Multilink® Hybrid Abutment

Multilink® Hybrid Abutment is a self-curing luting composite for the permanent cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Area of application:

Extraoral cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures (abutment and abutment crowns) on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Benefits:

- ✓ High bonding strength for a reliable cementation
- ✓ Easy handling due to the convenient automix syringe

Accessories

IPS® Object Fix Flow / IPS® Object Putty

Auxiliary firing pastes with varying viscosity to support all-ceramic restorations (especially IPS e.max® CAD) during firing and crystallization. The pastes are used to stabilize and secure the restorations on the silicon nitride support pins or directly on the silicon nitride firing tray. The pastes are easy to apply and remove after the firing procedure.

Delivery forms

IPS® Object Fix Flow	1 x 10 ml	605525
IPS® Object Fix Putty	1 x 10 g	605526

IPS e.max® CAD Crystallization Tray / IPS Speed Tray

The IPS e.max® CAD Crystallization Tray is a firing tray for the crystallization of IPS e.max CAD restorations as well as for the stains and/or glaze firing of IPS Empress® CAD, IPS e.max CAD and IPS e.max ZirCAD restorations with the IPS e.max CAD Crystall./materials.

The IPS Speed Tray is required for the speed crystallization of IPS e.max CAD.

To carry out the firing, the restorations are placed on the IPS e.max CAD Crystallization Pins supplied with the tray.

Delivery forms

IPS e.max® CAD Crystallization Tray Kit		767467
IPS e.max CAD Crystallisation Tray	1 x	
IPS e.max CAD Crystallization Pin (sizes: 1, 2, 3)	3 x each

Universal stains and glazes

IPS e.max® CAD Crystall./Shades/Stains and Glaze

Universal range of stains and glazes

IPS e.max® CAD Crystall./Shades, Stains and Glaze is a universal range of stains and glazes designed for use with IPS e.max CAD, IPS e.max ZirCAD and IPS Empress® CAD.

The glazing paste is available as a variant with and without a fluorescent effect^[1].

Minor corrections (e.g. proximal contact areas) can be applied to IPS e.max CAD and IPS e.max ZirCAD restorations using IPS e.max CAD Crystall./Add-On.

Types of restorations:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS Empress CAD

Benefits:

- ✓ Reduced stock, lower costs – a single range suitable for all CAD/CAM chairside ceramics from Ivoclar
- ✓ Familiar application methods and consistently high quality
- ✓ Glazing paste with and without a fluorescent effect^[1]
- ✓ Possibility of making corrections (e.g. proximal contact areas) using Add-On material

Shades:

- 7 shades (0, 1, 2, 3, 4, Incisal 1, Incisal 2)
- 7 stains (white, cream, sunset, copper, olive, khaki, mahogany)

^[1] At natural lighting conditions. LED-generated UV or UV-like light may result in a different impression.

Cementation

Variolink® Esthetic

Variolink® Esthetic is a versatile and esthetic light- and dual-cure luting composite for the permanent seating of all types of restorations and materials.

Areas of application:

– Variolink Esthetic LC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite restorations (inlays, onlays and veneers).
- Only use Variolink Esthetic LC for restorations with a low thickness of <2mm that have sufficient translucency (e.g. IPS e.max® HT).

– Variolink Esthetic DC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite resin restorations (inlays, onlays, partial crowns, crowns, bridges)
- Restorations made of opaque ceramics, e.g. oxide ceramics, can only be permanently cemented if an adhesive that is separately light-cured is additionally used.

Benefits:

- ✓ Straightforward Effect shade range
- ✓ Proven and reliable shade stability^[1]
- ✓ Easy excess removal^[2]
- ✓ Flexible, situational consistency^[2] – ideal combination of flowability and stability
- ✓ Ideal bonding to the dental hard tissue with Adhese® Universal^[3-5]
- ✓ Reliable bonding to the restoration with Monobond® Plus^[4, 5, 6]

Shades:

White opaque, Light+, Light, Neutral, Warm, Warm+

ZirCAD® Cement^[1]

ZirCAD® Cement is a new high performance resin modified glass ionomer cement designed for everyday use. It is ideal for high-strength restorations, especially zirconia. ZirCAD Cement allows the clinician to deliver predictable cementation results case after case with its easy handling and quick clean-up.

Areas of application:

Cementation of restorations based on retentive preparations

- Crowns, bridges, inlays and onlays made of high-strength ceramics
- Metal-based crowns, bridges, inlays and onlays
- Metal, ceramic and glass-fibre reinforced composite posts

Benefits:

- ✓ Quick and easy clean-up in the gel phase, can be expedited with the optional tack cure
- ✓ The simple way to cement zirconia and metal-based restorations
- ✓ Continuous fluoride release
- ✓ Moisture and acid resistant
- ✓ Low film thickness for an accurate marginal fit
- ✓ Single-product cement without primer or conditioner

Delivery forms

^[1] Only available in countries of the European Union, Liechtenstein, Great Britain and Norway

Speedcem® Plus

Speedcem® Plus is a clinically proven self-adhesive resin cement for the permanent cementation of high-strength zirconium oxide or metal restorations. Due to its self-curing and self-adhesive properties, Speedcem Plus is especially suitable for the cementation of opaque restorations.

Areas of application:

Speedcem Plus is suited for the permanent seating of crowns and bridges on natural teeth and on implant abutments that are made of the following restorative materials:

- Oxide ceramics such as zirconium oxide, e.g. IPS e.max® ZirCAD
- Metal and metal-based restorations
- Lithium disilicate glass-ceramics, e.g. IPS e.max®

Benefits:

- ✓ Ideal for high-strength, opaque zirconium oxide and metal restorations
- ✓ Higher reliability due to the strong bond when used in self-curing mode
- ✓ User-friendly, simple application protocol
- ✓ Easy removal of excess material
- ✓ High radiopacity

Multilink® Automix

Multilink® Automix is a luting composite for the permanent adhesive cementation of indirect restorations made of silicate and oxide ceramics, metal and metal-ceramics (PFM) and composite resins. Used together with the matching Multilink Primers A and B, the material generates a strong and long-lasting bond to the tooth structure.

Areas of application:

Cementation of indirect restorations (inlays, onlays, crowns, bridges, endodontic posts) made of:

- metal and metal ceramics (PFM)
- all-ceramics (silicate)
- reinforced all-ceramics (zirconium and Al oxide ceramics)
- composites and fibre-reinforced composites (FRC)

Benefits:

- ✓ Reliable performance in adhesive cementation
- ✓ Wide range of applications
- ✓ Varied selection of shades

Monobond Etch & Prime®

Monobond Etch & Prime® is a single-component ceramic primer that allows **glass-ceramic surfaces** to be etched and silanated in one easy step.

Areas of application:

Conditioning of glass-ceramic surfaces for the adhesive bond with luting composites

Benefits:

- ✓ Eliminates the unpopular etching of the glass-ceramic surface with hydrofluoric acid
- ✓ The glass-ceramic is etched and conditioned in one step
- ✓ Creates a reliable bond between restoration and luting material

Delivery forms

Refill	1 x 5 g	673026WW
--------	---------	----------

Monobond® Plus

Single-component bonding agent for all indirect restorative materials

Areas of application:

Single-component bonding agent for all indirect restorative materials (glass- and oxide ceramics, metal, composite, fibre-reinforced composite). For a strong bond between the restoration and the luting material.

Delivery forms

Refill	1 x 5 g	626221
--------	---------	--------

Ivoclean®

Universal cleaning paste especially designed for removing contaminants, in particular proteins, from restoration surfaces after intraoral try-in.

Areas of application:

Extraoral cleaning of pre-treated ceramic and metal restoration surfaces

Delivery forms

Refill	1 x 5 g	637568
--------	---------	--------

Liquid Strip

Glycerine gel to prevent the oxygen-inhibited layer of composites when seating composite or ceramic restorations.

Areas of application:

- Try-in paste
- Preventing an inhibited layer with composites
- Protecting the etching pattern of lab-fabricated all-ceramic restorations

Delivery forms

Refill	1 x 2.5 g	532505
Liquid Strip application tips	20x	533666

OptraStick®

OptraStick® is a placement instrument that features a flexible adhesive tip. The tip allows small objects, inlays, onlays and veneers made of various materials (e.g. IPS Empress®, IPS e.max®) to be picked up, held, carried and placed precisely, quickly and easily.

Benefits:

- ✓ Easy pick-up
- ✓ Strong adherence
- ✓ Secure positioning

Delivery forms

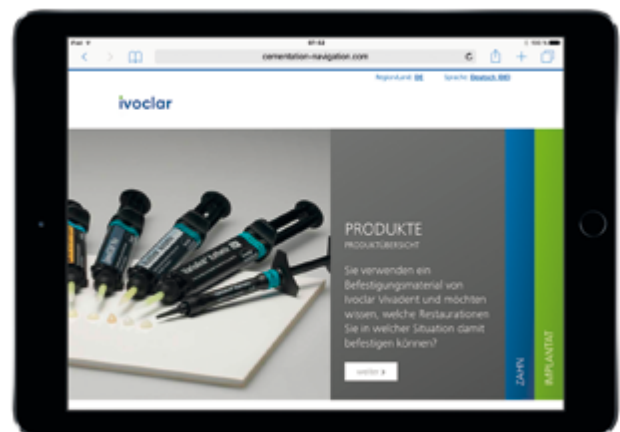

Refill	48 pcs	699972

Cementation Navigation System

The Cementation Navigation System helps you to find the most suitable luting material for almost any cementation problem, irrespective of the substrate: tooth structure or implant abutments.

In addition, CNS shows all the benefits offered by the luting cements from Ivoclar.

Clear and detailed animations give you a comprehensive tour of the procedure, starting with removal of the temporary restoration and ending with topical fluoride application.

cementation-navigation.com

Ceramic, crystallization and sinter furnaces

Programat® CS2

The Programat® CS2 is the ideal firing and crystallization furnace for dentists. The furnace has been specially developed for the crystallization of IPS e.max® CAD restorations. The Programat CS2 is easily operated by means of the new colour touchscreen display and the proven membrane-sealed keypad. It is furthermore equipped with 20 individual programs as well as predefined Ivoclar programs, such as the Speed program, which crystallizes IPS e.max CAD restorations in less than 15 minutes.

The new and modern operating concept and the QTK2 muffle technology are only two of the many new innovations featured in the Programat CS2. The QTK2 muffle technology ensures an even more homogeneous heat distribution in the firing chamber, leading to optimum firing results and a prolonged life cycle of the heating element. Additionally, the new vacuum pump control system with double valve technology ensures noiseless and power-saving operation of the vacuum pump.

Technical data

Voltage	200 – 240 V / 50–60 Hz 110 – 120 V / 50–60 Hz 100 V / 50–60 Hz
Dimensions (closed)	Depth: 465 mm Width: 305 / 410 mm (incl. cooling tray) Height: 320 mm
Usable size of the firing chamber	ø 90 mm Height: 80 mm
Maximum firing temperature	1200 °C

Benefits:

- ✓ Colour touchscreen in combination with the proven membrane-sealed keypad
- ✓ QTK2 muffle technology with SiC bottom reflector
- ✓ Operating concept specially developed for the dental practice
- ✓ Automatic double-range calibration (ATK2)
- ✓ Remote diagnostics through the Internet via e-mail and data log files
- ✓ Software update via USB flash drive
- ✓ Integrated power-save function (Power-Save Technology)
- ✓ OSD display
- ✓ Modern, ergonomic design
- ✓ Software update via USB flash drive
- ✓ Modern interfaces (USB, ethernet, SD card reader)
- ✓ Large cooling tray
- ✓ Integrated tong holder
- ✓ 20 individual firing programs
- ✓ Double-valve vacuum technology
- ✓ Removable furnace head
- ✓ Power Fail Save System

Delivery forms

Programat® CS2	200 – 240 V/50 – 60Hz*	645986
Programat CS2, power cord, vacuum hose, cooling tray, SiC firing plate, Programat Firing Tray Kit, Automatic Temperature Checking Set 2 ATK2 (test set), USB download cable, Programat USB flash drive, extra fuses, display cleaning cloth, tong holder, firing tongs, IPS Speed Tray, var. accessories		

* other voltage versions available

Programat® CS6

The Programat® CS6 is a combination furnace for the quick sintering, crystallization and glazing of dental ceramic materials. Due to the innovative firing chamber technology, restorations made of blocks up to size B55 can be processed in a short amount of time. The new opening mechanism optimizes and accelerates the pre-drying process with the warm air rising from the firing chamber and drying the restoration from below. The compact firing chamber and the new opening mechanism substantially reduce the program times for Ivoclar materials, which, in turn, reduces the processing time in the dental office to a minimum.

With the vacuum during the sintering process, which is unique in the dental world, the program times for IPS e.max ZirCAD materials can be clearly shortened. At the same time, the esthetic appearance of the restorations is considerably higher compared to that produced by other chairside furnaces. In addition to pre-installed programs for Ivoclar materials, programs for materials from other manufacturers can also be created easily.

Benefits:

- ✓ Combination furnace for the quick sintering, crystallization and glazing
- ✓ Superspeed crystallization program
- ✓ Vacuum for sintering programs (external vacuum pump necessary)
- ✓ Colour touchscreen in combination with the proven membrane-sealed keypad
- ✓ DSA – Digital Shade Assistant
- ✓ Compact design
- ✓ Temperature calibration on location possible
- ✓ OSD display (optical status display)
- ✓ 30 individual firing programs
- ✓ Programat WLAN kit for wireless data transfer
- ✓ Software update via USB flash drive

VP5 vacuum pump

The high-performance VP5 vacuum pump has been especially developed for the Ivoclar ceramic and press furnaces. The pump features a very high delivery rate. In addition, it is characterized by a distinct design and a carrying handle for convenient relocation.

Technical data

Voltage	220–240 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
	100 V / 50–60 Hz
Power consumption	80 Watt
Final vacuum	approx. 20 mbar

Delivery forms

VP5 vacuum pump (white)	230 V/ 50–60 Hz*	666308
VP5 vacuum pump	1x	
Sound absorber	1x	
Vacuum Pump Filter Kit	1x	
* other voltage versions available		

VP3 easy vacuum pump

The small and light-weight VP3 easy vacuum pump is suitable for the evacuation of the firing chamber of the Ivoclar ceramic furnaces. This vacuum pump is not suitable for press furnaces.

The VP3 is a diaphragm pump that is characterized by low weight and extremely small dimensions.

Technical data

Voltage	230 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
Power consumption	70 Watt
Dimensions	W 140 x H 130 x D 210 mm
Final vacuum	approx. 40 mbar

Delivery forms

Programat® CS6 tweezers

The special tweezers with the ceramic tips are used to load the furnace.

Delivery forms

Programat® CS6 tweezers	1x	749897
-------------------------	----	--------

Automatic Temperature Checking Set ATK 2

The Automatic Temperature Checking set ATK2 is used to check and adjust the firing temperatures in furnaces with automatic calibration programs for the ATK2 system (e.g. Programat® P500, P510, P700, P710, CS, CS2, CS3, EP 3000, EP 3010, EP 5000, EP 5010 including Programat G2 devices).

The simultaneous double-range calibration is a special feature of the ATK2.

Delivery forms

Automatic Temperature Checking Set ATK 2	598833
ATK2 sample	5x

Firing tongs

These firing tongs are used to place objects in the firing chamber. High precision and excellent material quality are the special features of these tongs.

Delivery forms

Firing tongs	1x	530665
--------------	----	--------

Digital Shade Assistant starter kit

The Digital Shade Assistant starter kit is designed specifically to help users get started in digital shade selection and includes the components required for this. The Digital Shade Assistant holder provides convenient placement of the shade guide teeth.

Delivery forms

Digital Shade starter kit	679917
Digital Shade Assistant holder	3x
A-D shade guide	1x

Digital Shade Assistant holder kit

The Digital Shade Assistant holder provides placement of the shade guide teeth for the DSA function.

Delivery forms

Digital Shade Assistant holder kit	679916
Digital Shade Assistant holder	2x

Temporary restorations

Telio® Inlay

Telio® Inlay is a light-curing, single-component temporary restorative material.

Areas of application:

- Deep inlay preparations with parallel walls
- Reversible obturation of screw access holes in implant superstructures

Benefits:

- ✓ Light-curing, single-component material
- ✓ Quick and easy application, removal in one piece
- ✓ No additional temporary cement or adhesive required
- ✓ Bonds to the tooth but does not stick to the instrument
- ✓ Demonstrates low polymerization shrinkage
- ✓ Seals tooth cavities effectively and shows no discolouration
- ✓ Available in two different shades and presentations (syringes and Cavifils)

Shades:

Transparent and Universal

Delivery forms

Refill Telio® Inlay syringe	3 x 2.5 g	
Universal		701261
Transparent		701265
Refill Telio® Inlay Cavifil	30 x 0.25 g	
Universal		701263
Transparent		701267

Telio® Onlay

Telio® Onlay is a light-curing, single-component temporary restorative material.

Areas of application:

- Wide, shallow cavities with few retentive areas, such as onlay preparations
- Reversible obturation of screw access holes in implant superstructures

Benefits:

- ✓ Light-curing, single-component material
- ✓ Quick and easy application, removal in one piece
- ✓ No additional temporary cement or adhesive required
- ✓ Bonds to the tooth but does not stick to the instrument
- ✓ Demonstrates low polymerization shrinkage
- ✓ Seals tooth cavities effectively and shows no discolouration
- ✓ Available in two different shades and presentations (syringes and Cavifils)

Shades:

Transparent and Universal

Delivery forms

Refill Telio® Onlay syringe	3 x 2.5 g	
Universal		701266
Transparent		701262
Refill Telio® Onlay Cavifil	30 x 0.25 g	
Universal		701268
Transparent		701264

Core build-up materials

MultiCore® Flow

Self-curing composite core build-up material with light-curing option.

Two curing methods and four shades provide an optimum foundation for the reconstruction of vital and non-vital teeth with part or most of the clinical crown missing.

Indications:

Core build-up of vital and non-vital teeth

Benefits:

- ✓ Based on Ivoclar's long-term experience in the field of composite technology
- ✓ A suitable option for every case: self- or light-curing
- ✓ Four different shades

Shades:

Light, medium, blue and white

Customer Care

Faster Solutions

With multiple ways to connect with us, you can get the help you need quickly. Innovative tools like the instant video assistant enable real time dialog and troubleshooting through a safe and secure channel.

Expert Care

Direct contact with local and global support specialists who know the products best ensures you receive the quality service you expect. Trained and certified service technicians are standing by for all your technical needs.

On-site Assistance

From secure delivery and installation, to on-site maintenance and repair, our Customer Care field representatives will get you up and running.

Investment Protection

Tailored service packages are available to protect your equipment and offer peace of mind. Save time, reduce potential urgent repair costs, and never miss your deadlines.

Continued Confidence

Routine service and maintenance support through Customer Care can help identify and fix any potential issues with your equipment before it leads to an interruption of your work.

Regular service and maintenance is essential for any piece of equipment to ensure it continues to operate reliably, safely, and effectively.

All-round Protection for your Investment

Take the guess work out of your service and maintenance needs with routine support from our experts. On-site and remote assistance ensures optimal equipment performance.

Get Expert Support

Enjoy peace of mind with premium technical support for your investment every step of the way. Our trusted, certified service specialists know your equipment inside and out. You are in safe hands..

Minimize Machine Downtime

Annual maintenance allows us to identify and fix any potential issues with your equipment before it leads to an interruption of your work. Save time, reduce potential urgent repair costs, and never miss your deadlines.

Quality Assurance

Equipment parts may need replacement due to wear and tear from regular usage. With the extended warranty option in our service packages, you enjoy peace of mind knowing you are covered. Additionally, all replacement parts come with a promise of consistent quality and are tailored to your individual milling systems.

Service Packages Overview

PrograMill® PM7, PM5, PM3 and DRY

Basic Package

This package with unlimited renewal offers a small discount on wear parts and is ideal for your basic maintenance needs.

Advanced Package

This package with extended warranty coverage offers discounted wear parts and provides the ideal value for money on maintenance and repairs.

Premium Package

This package with extended warranty coverage offers complete wear part protection and is ideal for those looking for maximum insurance on all maintenance and repairs.
